Docket No. A073 USCN2

Applicants: Gotwals, et al.

Application No.: To Be Assigned

Filed: Herewith Page 5 of 9

## Claim Amendments:

Please amend the claims as follows.

1-8 (canceled).

Rule 1.126

- 15 %. (new): A method for treatment of rheumatoid arthritis comprising administering to a subject suffering from rheumatoid arthritis a therapeutically effective amount of an antibody molecule comprising antigen binding regions derived from the light and heavy chain variable regions of an antibody to an α1β1 integrin or fragment thereof.
- 16. (new): A method for inhibiting or preventing rheumatoid arthritis comprising administering to a subject at risk of developing or suffering from rheumatoid arthritis a therapeutically effective amount of an antibody molecule comprising antigen binding regions derived from the light and heavy chain variable regions of an antibody to an α1β1 integrin or fragment thereof.
- 17 LV. (new): A method of claim 8, wherein the antibody is AJH10 secreted by a hybridoma designated as ATCC PTA-3580.
- 18 12. (new): A method of claim 10, wherein the antibody is AJH10 secreted by a hybridoma designated as ATCC PTA-3580.
- (new): A method of claim, wherein the antibody is a human antibody, a chimeric antibody, a humanized antibody, a monoclonal antibody, or a polyclonal antibody.
- 20 14. (new): A method of claim 16, wherein the antibody is a human antibody, a chimeric antibody, a humanized antibody, a monoclonal antibody, or a polyclonal antibody.
- 21 18. (new): A method of claim 8, wherein the antibody is an anti-α1-I domain blocking antibody and the amino acid sequence of the antibody epitope comprises the sequence Val-Gln-Arg-Gly-Gly-Arg (SEQ ID NO: 8) or an amino acid sequence that is equivalent or homologous to such sequence.
- 22 16. (new): A method of claim 10, wherein the antibody is an anti-α1-I domain blocking antibody and the amino acid sequence of the antibody epitope comprises the sequence Val-Gln-Arg-Gly-Gly-Arg (SEQ ID NO: 8) or an amino acid sequence that is equivalent or homologous to such sequence.

Rule 1.126

23 M. (new): A pharmaceutical composition comprising a pharmaceutically acceptable carrier and an amount of the antibody AJH10 secreted by a hybridoma designated as ATCC PTA-3580 effective in preventing, inhibiting, or treating rheumatoid arthritis.
